

C*TRAFFORDGOLD

C*TRAFFORDGOLD comes from the Cerestar processing facility in Manchester. It is produced as a result of processing wheat to make four key ingredients for human foodstuffs; starch, glucose syrups, vital wheat gluten and alcohol.

C*TRAFFORDGOLD can be fed to most livestock in a wide range of feeding situations. Whether used as part of a total mixed ration (TMR), as a sole concentrate feed or even as a forage replacer, care should be taken to ensure sufficient long fibre is fed.

TYPICAL ANALYSIS (DRY MATTER BASIS EXCEPT DM)

DRY MATTER (%)	50-55
CRUDE PROTEIN (%)	21
OIL (%)	7.5
NDF (%)	35
STARCH(%)	17.5
SUGAR (%)	1.5
ME (MJ / KG DM)	13.4

KEY BENEFITS

- Highly palatable
- Value for money
- High performance feed
- Simple and convenient
- Fully traceable
- Highly suitable for pitting during summer for subsequent winter feeding
- Ideal buffer feed

FEEDING RATES

Dairy cows **Up to 10kg/hd/day fresh weight**

Beef cattle **Up to 6kg/hd/day fresh weight**

(Typically used at up to a third of the dry matter for beef fattening diets, i.e. 50% C*TraffordGold and 50% cereals/protein on a fresh weight basis)

Youngstock **Up to 6kg/hd/day**

Sheep **Up to 3kg/hd/day fresh weight**

HANDLING AND STORAGE

Whether fed fresh or ensiled, it is essential to exclude all air and water from the silo.
