

PREMIER GRASS LEYS FOR IRISH FARMERS

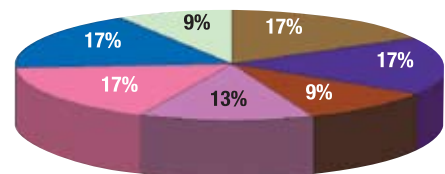

STOCKMAN PERMANENT PASTURE

Flexible Use Ley

'The Perfect All Rounder'

PERMANENT PASTURE is a highly popular grass mixture and the biggest selling mixture in the STOCKMAN range. It has been designed, as the name suggests to provide quality grazing and cutting over many years.

The inclusion of a range of leading perennial ryegrasses, both Diploid and Tetraploid, means PERMANENT PASTURE can supply adequate volumes of grass under a variety of management systems. Its flexibility means it will give an excellent response to more intensive grassland management systems and will also give good results under more extensive grassland practices. If you are looking for reliability and flexibility from your grass then PERMANENT PASTURE is the mixture for you.
